T118

Digital AM/FM Tuner

The **T118** is a digital tuner featuring an illuminating display with 10 AM and 10 FM preset station memory and auto station search.

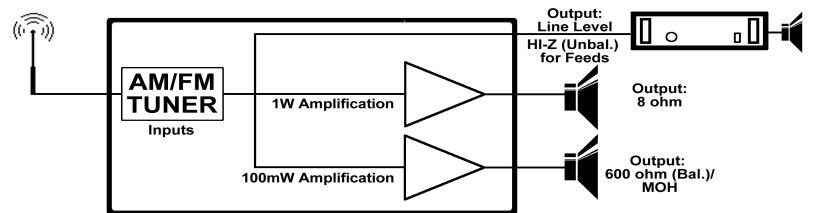

In addition to its Hi-Z level output, model **T118** contains a line amplifier with two independent output channels (600 ohm and 8 ohm). Thus, the **T118** conveniently is designed to supply music for "music-on-Hold" systems, to drive a monitor speaker, or for longer output cable runs. For example, the versatile **T118** digital tuner is capable of driving a "Music-on-Hold" system, providing a line level output for amplifier feed, and monitor speaker simultaneously. The monaural output combines incoming stereo signals ensuring full frequency response distribution throughout each speaker's coverage area. A 12 VDC power connection is available for emergency power or for use in remote locations.

Plus, with over 65 years of experience in the industry, **Grommes~Precision** backs the **T118** with its unbeatable expertise and Precision Assurance Pledge: **7 Year Warranty** and **30 Day Money Back Guarantee**.
